Card Number:

Signature

Cardholder's Name

Start Date

Expiry Date

CVC No

(last 3 digits on back of card)

Issue Number (if relevant)

The subject areas to be covered are:

Periodontal Assessment in general terms

Usage, value and mishaps with the BPE (Basic Periodontal Examination)

Risk factors and their impact upon disease

Chair side tools for risk factor analysis

Periodontal Diagnosis in general terms

The factors to consider when reaching a diagnosis

Diagnostic dilemmas

Fundamental role of home care in Periodontal Management

How can compliance (or adherence?) be encouraged in recalcitrant patients?

What oral hygiene methods should patients be using?

Non surgical treatment methods - root planing vs debridement - what are the differences?

Use of systemic antimicrobials

The role of novel treatments - photodynamic disinfection

Aim

- To update the dental team on Periodontal Issues relating to Assessment, Diagnosis and Treatment.

Learning Objectives

- To clarify the importance of correct periodontal assessment and risk analysis
- To identify the ideal clinical parameters to be used at various stages of periodontal disease management
- To assist the dental team in making suitable periodontal diagnoses
- To highlight the importance of the patient and dental team in the joint management of periodontal diseases.
