

An Italian company founded in 2001, Curasept® works closely with dental professionals worldwide to help ensure patients have every opportunity to enjoy a healthy, happy and confident smile for life.

With a highly scientific approach, Curasept has developed a range of innovative, reliable and highly effective solutions that give a continuous boost to improve chemical and mechanical oral hygiene performance.

Whether it is through the Curasept ADS range of 'anti-staining chlorhexidine' based mouthwashes, toothpastes and topical gels or the Curasept Biosmalto range of 'remineralising hydroxyapatite substitute' based mouthwashes, toothpastes and F-ACP high impact mousses; everything Curasept does has the needs of patients at the very heart of it.

Curasept is therefore a proud sponsor of BSP, and all of the fantastic work it does to help raise awareness of the links between periodontal and systemic diseases.
