ADVANCED COURSE FOR DENTISTS

THE BONE SETS THE TONE

A Crown Lengthening
Masterclass

HANDS-ON COURSE

20th April 2024
28th September 2024

Welcome to the Institute of Perio-Prosthodontics

We are a training academy for dentists, founded and run by dentists. Our mission is to give fellow clinicians access to high-quality training opportunities to develop and improve their skills.

Through inspirational and evidence-based teaching with acclaimed professionals from across the globe, we want to help you achieve your career potential, offer the best possible care to your patients, and love what you do every day.

THE BONE SETS THE TONE

A Crown Lengthening
Masterclass

HANDS-ON COURSE

What You Will Learn

- Anatomical Precision Mastery
- Patient-Centric Proficiency
- Experience hands-on exercises for practical learning
- Structural Preservation Expertise
- Surgical Mastery Toolkit

Who is the course in- tended for?

Gain in-depth insights into periodontal and surgical anatomy, essential for precise diagnosis and effective crown lengthening procedures.

Learn to identify indications and contraindications, ensuring proper patient selection for successful crown lengthening outcomes.

Master the concepts of biological width and ferrule for optimal restorative dentistry, preserving tooth structure ensuring long-term success.

Acquire comprehensive skills in osseous surgery, instrumentation, suturing techniques, and flap reflection for precise and efficient crown lengthening procedures.

Learn a Repeatable Reproducible Predictable Technique.

Tailored for general dentists and specialists aiming to enhance expertise in crown lengthening. Ideal for those committed to elevating restorative dentistry and delivering predictable, high-quality outcomes for patients.

Speakers

Dr. Mitul Shah

- Key role in the British Society of Periodontology, serving as the past chair of the Early Careers Group and participating in the main BSP council
- Experienced in managing complex gum disorders, reconstructing missing bone, and placing dental implants, with a particular expertise in treating 'gummy smiles'

He graduated in dentistry from King's College London in 2012 and subsequently gained diverse experience in general practice, oral and maxillofacial surgery, and restorative dentistry.

Motivated by these experiences, he pursued a career in Periodontics, completing an intensive four-year specialist training program at Guy's Hospital with a distinction. Actively involved in the British Society of Periodontology, he served as the past chair of the Early Careers Group and contributed to the main BSP council.

Known for his expertise in managing complex gum disorders and 'gummy smiles,' his care is characterized by precision and attention to detail. He frequently engages in continued professional development to stay abreast of the latest advances in clinical practice.

Dr. Sachin Shah

- Highly experienced specialist periodontist and implant surgeon.
- Extensive teaching background.
- Recognized on the General Dental Council's specialist list for Periodontics.
- Expertise in cosmetic gum surgeries, mucogingival surgery, and dental implants, with a focus on complex implant rehabilitation and oral health improvement.

Dr. Hussain is a highly-qualified extensively experienced specialist periodontist and implant surgeon, with years of experience teaching and training budding dentists wishing to elevate their surgical skills.

Dr. Hussain has accumulated a wealth of practical experience in specialised periodontic practices, concurrently serving as a clinical educator at the University of Manchester Dental Hospital.

Furthermore, is a co-founder of PerioMatters, an initiative where his profound expertise and skills are employed to assist fellow clinicians in their ongoing professional development.

He is a member of the leadership team for the National Osteology Group UK, whose goal is to disseminate the latest research and make it accessible to more clinicians.
